Postgraduate and Postdoc Small Funding Grants 2023

The Stem Cells Interdisciplinary Research Centre (IRC) invites postgraduate researchers and postdoctoral research fellows to submit applications for research funding and training, rooted in stem cell research that fosters integration along disciplines.

Details of the Scheme

Grants up to £2.5k

- Develop new exploratory research on stem cells that spans disciplines and/or themes. This call will not consider applications for continuation of existing research projects.
- Exchange visits within the University or outside aimed at supporting individual mobility, strengthening existing networks and fostering collaboration between researchers. This could involve learning new techniques, gaining access to instruments or methods not available at IRC.

Grants up to £1k

- Enable attendance to courses, conferences and workshops focused on interdisciplinary training or discipline hopping. Funds may be used to cover travel costs but applicants are expected to seek funding from other sources in addition to their award.

Please note:

- Applications should be accompanied by a letter of support from your supervisor.
- Awards are tenable for up to 18 months.

Eligibility

The scheme is open to all postgraduate researchers and postdoctoral research fellows of the University with an interest in stem cell research, either individually or in a small team.

Successful applicants will be expected to submit a report on their project at the end of the funding period and present the funding outcomes at the Institute Annual Retreat.

For more information please contact Laura Puhl (lmp58@cam.ac.uk).

For support of up to £2k for public engagement activities, the Cambridge Stem Cell Institute operates a standalone public engagement seed funding scheme. More details can be found at https://www.stemcells.cam.ac.uk/about-us/engage/engaged-research-culture.

How to Apply

Complete the application form and submit to Laura Puhl (lmp58@cam.ac.uk)

Deadline for applications: 31 January 2023
